# I. Application Guidelines

## 1. About JDS Scholarship

The Project for Human Resource Development Scholarship (JDS) was launched by the Government of Bangladesh with the assistance of the Government of Japan in 2001.

JDS is funded by the Government of Japan through its ODA (Official Development Assistance) budget.

JDS targets young government officials and others who are expected to play a leadership role in the development of their countries.

JDS provides scholarships to Bangladesh government officers to study at two-year Master Degree courses (instructed in English) of Japanese universities.

### Objectives of JDS

- To support for Human Resource Development**  
 JDS's objective is to strengthen the government's administrative capacities in Bangladesh, through providing the opportunity to obtain the Master's degree to the young capable government administrators who are expected to engage in formulating and implementing social and economic development plans and to play a leadership role in the development of the country.
- To Enhance Bilateral Relationships**  
 JDS fellows are expected to solidify foundations to further bilateral relations with Japan by utilizing their human network developed through academic and social activities while in Japan.

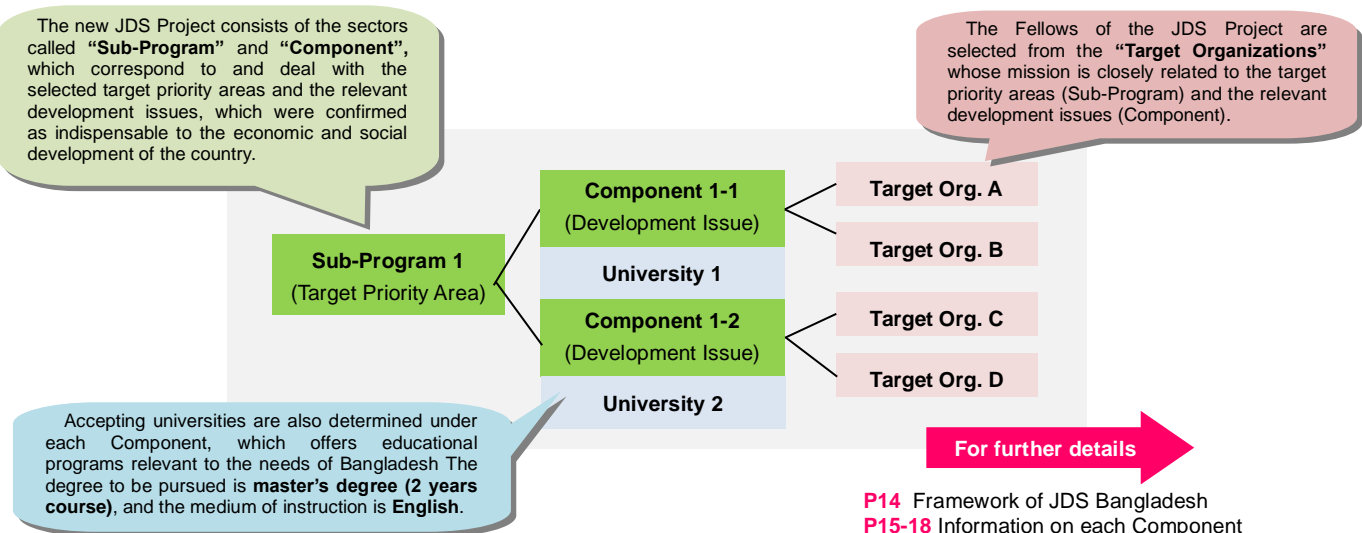

### Beneficiaries of JDS

- For the participants (JDS Fellows)**  
 JDS Fellows are going to study in highest level research institutions in Japan. Fellows will conduct research with world top level researchers and acquire expertise to use for policy making and institutional building for the development of their country. Fellows can also have opportunities to build human network in and out of Japan through the two-year study in Japan. After the program, fellows can contribute to the development and prosperity of Bangladesh with those expertise and human network they build in Japan.
- For the organizations (The Fellows' workplace)**  
 The Fellows' workplace will attain highly-capable and motivated returnees (JDS Fellows) who can effectively contribute to the organizational missions.
- For the Country (The Fellows' country)**  
 The Fellows' country will improve institutional capability of the target organizations which leads to foster country's development.

## 2. System of JDS Bangladesh

The framework of the JDS Project under the "New System" was made applicable to Bangladesh in 2009 and was revised in 2013, 2017 and 2021. The new approach gives its importance on "selection and concentration" on the target priority issues to enhance effectiveness and efficiency of the program. A single program (One phase) is designed to accept four batches of Fellows (Fellows in each fiscal year constitute one batch). This year's application is for the 3rd batch in phase 4.

## II. How to Succeed in Application

### 1. Application Documents

All applicants are required to submit a set of necessary documents. Please follow the instructions below.

#### 1) Application Documents

- Application Form (AF) and other designated forms can be downloaded from JDS website ( <https://jds-scholarship.org> )

#### 2) Precautions

- Fill out the Excel sheet form and send the form by e-mail to [jds.bangladesh1@jice.org](mailto:jds.bangladesh1@jice.org).
- Two (2) sets** of Application Documents all in A4 size printed out must be submit with other necessary documents: **One (1) set directly to JICE, and one (1) set through the respective controlling authority.** (See the list below for details.)
- To prepare for the 2 sets, please mind 3 types of documents. (Original / Attested Copy of Original / Photocopy of Original)
- All documents written in other language than English need **official English translation.** (Self-translation is not acceptable.)
- Do not staple the documents. Put a paperclip on them instead.
- Submit "**Reason Letter**" in case where wrong information (e.g. wrong spelling of name, birthday, etc.) is contained in the ID and official documents **due to administrative errors.**
- Make your own extra copy of the Application Documents before submission.

#### 3) List of Application Documents

## 2. Tips on Application and Selection (Reference)

The better you prepare for the Application Documents, the more chances to pass the selection you have. Here are some tips on the preparation of Application Form (AF) and Research Plan (RP).

### About the selection and criteria

As shown in the chart above, you are advised to collect detailed information about JDS, Japan and the universities through literature survey and so on before applying to JDS. Also, it is important to know in advance about its selection and evaluation criteria (P5), and prepare your AF and, RP with a view to winning the selection.

### (1) Understanding JDS

#### Objectives and framework

The objectives of JDS are written in P2. “Sub-Program and Component (SP/CP)” and “Targeted Organizations (TO)” are shown in P14. But, here, most importantly, you have to note the reasons why JDS is provided to the government sector, why SP/CP and TO are set in the JDS framework. The answers to those questions will be an important basis in making preparation for AF and RP.

- JDS is designed to support the human resource development of Bangladesh
- Government sector can directly and widely contribute to the development
- SP/CP are set based on the development plan of Government of Bangladesh and Japan aid policy,
- TO (You and your workplace) are considered to be closely involved in the development.

### (2) Country analysis

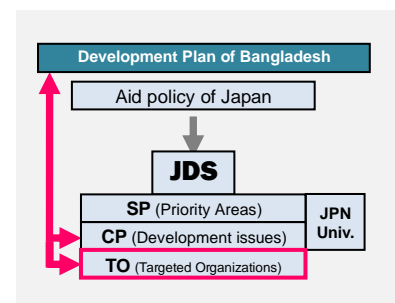

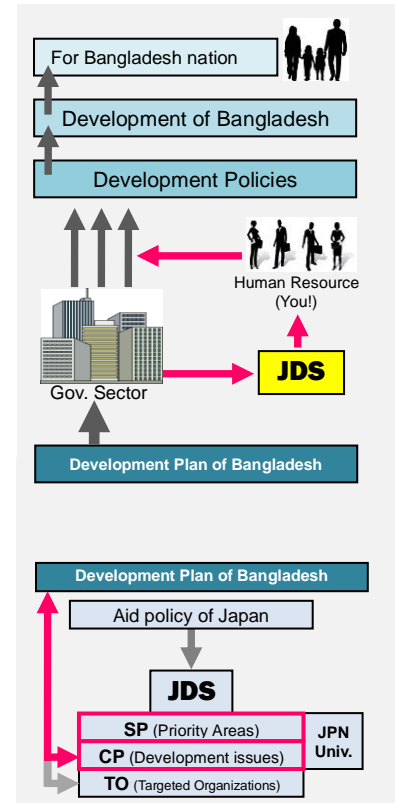

As mentioned in “(1) Understanding JDS” above, “SP/CP” is set based on the development plan of the Government of Bangladesh (Rectangular strategy, NSDP, etc.). First, read and understand a background of the SP/CP you wish to apply for (P14) to know what kind of development issues are assumed and what kind of research are expected under JDS. Then, obtain information on development issues of Bangladesh (8<sup>th</sup> 5-year Plan 2020 - 2025) to deepen your understanding on the status of the development. This analysis of present development status will be important not only for making a RP but also for later selection steps (interviews).

- Read and understand a background of the SP/CP you apply for (P15~)
- Check such materials as NSDP, issues of your organization, etc.

### (3) Organization task analysis

As shown in “JDS framework (P14)”, TO is set under the each CP and considered to be closely related with the development issues (CP). Therefore, it is essential for you to know what kind of mission your organization has in the context of the development of Bangladesh. Also it is important to observe what kind of issues your organization is tackling with and what are lacking to solve the issues. Those observations will help you conduct further analysis.

- Check missions and roles of your organization in the context of the development of your country.
- Also observe what is necessary in your organization to solve the development issues of your workplace. Those observations will help you find reasons to study in Japan.

#### (4) University research

As shown in “JDS framework (P14)”, the relevant Japanese universities (courses) are designated under the each CP. Those universities are selected to offer you with sufficient knowledge in order to tackle development issues of your concern. As the universities wish to recruit students with necessary academic level and high motivation to learn, you need to demonstrate those points in the following way.

- One of the ways to show self-motivation is to demonstrate how much you know about the university you are applying for.
- Go to the university website to know their location, history, provided courses, the faculty members, etc.
- Find interesting professors, and check their research areas, current activities, their published academic papers, etc.

#### (5) Career plan

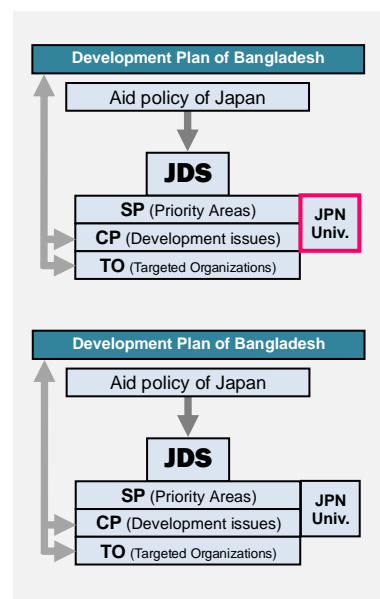

As you can see it in Application Form (AF), you will be required to fill in **[Question6]** your work experience, **[Q7]** Research plan, **[Q8]** Reason why you have chosen to apply to the Graduate School/Course/Program selected in Q1, and **[Q9]** future contribution. Those questions are very coherent in the sense that each question asks [who you are / what you are doing now], [what you want to do in Japan] and [what you can / want to do after your study]. So, those questions ask how you relate your career and the study **in the context of the development of your country**. This is a clear tip to answer to those questions in AF.

Question 6, 7, 8 and 9 in the AF are NOT separate questions. They are very coherent.

##### About “Responsibilities of Your Work” [Q6] in AF

Due to lack of understanding of the connections among [Q6], [Q7], [Q8] and [Q9], some people do nothing but list up their daily work on [Q6] without being aware of those connections. As mentioned above, it is important to show your current (or previous) work in the context of the development issues in order to bridge your answers to the next questions (Research Plan and career plan after study).

Q6 just asks your current and previous works. But, based on your answers in this Q6, the interviewers (the university and OC) try to guess if you can use acquired knowledge in your work after you return from Japan. Therefore, Q6 and Q9 are two sides of the same coin.

##### About Research Plan [Q7] in AF

The details about how to write Research Plan (RP) is explained in (P10). On the basis of the explanation above, keep in mind that the RP is considered as an extension of your work [Q6], which will lead to your career plan after you study in Japan [Q9].

##### About Future Plan after study in Japan [Q9] in AF

You may have a problem in answering to this question about how you will contribute to the development after your study in Japan. Considering the objectives of JDS, this is a very important factor through the selection process. Every year, some applicants provide answers such as “I will share my knowledge”, “I will teach at educational institutions” and so on. Those are, of course, important. But, if you are a JDS interviewer, would you be attracted by such answers?

- If you have finished the analysis in (2) ~ (4) above, you should be able to identify the needs of your country and organization as well as your tasks to fulfill such needs.
- It is important to layout your future career plan (after your study in Japan) in relation to the needs of your country and organization, which also will be a solid and good reasoning to study in Japan!

#### (6) Research on relevant issues in Japan

The JDS Fellows are to conduct a research on development issues of their home countries. And also, taking into account that they study in Japan, you are also recommended to know in advance, at least, about historical and empirical cases of Japan in your research field.

#### (7) Test preparation

As shown in “Selection Process (P4)”, the results of English and Math tests will be reviewed by the universities in the 1<sup>st</sup> selection (AF and RP screening by the universities in Japan) and afterwards.

- It is strongly recommended to prepare for those tests, improving your ability by self-study. You can prepare both tests in advance!
- About IELTS test, get used to the test format using sample test and textbooks.
- About Math test, question and solution of the past years’ test are available at JDS Website. Using the past test, check rules and formulas in school textbooks!

### 3. Guidelines for Writing a Research Plan

#### (1) Guideline for writing a research plan

In the application for JDS, the research plan for your Master's thesis should ;

- Address the current issues/problems of the socioeconomic development of your country and how to remedy these issues/problems.
- Present a detailed work plan on how and what you will do to achieve for the goal of your study.

The research plan, which is submitted for the application is not deemed to be final. It will be revised during the course work in the line with the Component. The purpose of the research plan is to help its readers (faculty members of graduate schools) evaluate the significance and potentiality of your research from the following aspects:

- 1) Does the research plan address the important policy questions of the applicant's country?
- 2) Does the research plan show that the applicant is strongly motivated and adequately prepared to implement the research successfully?
- 3) Who will benefit from the result of the research? Will the result of the research contribute to solving or clarifying policy questions which are important for applicant's country?

- 4) Does the research help the applicant to more effectively participate in the development process of your country after the completion of the course?
- 5) Is the applicant's academic background strong enough to implement the research plan?
- 6) Is the applicant's work experience sufficient to pursue the research? (Not necessary if other application material is good enough to show that the answers are positive.)
- 7) Does the research plan fit well with the program of the graduate school?
- 8) Are the applicant's research questions academically significant?

The importance of each point above, however, depends on the field of study and the graduate program you are applying for. Some graduate programs may require more specific information about the data and method of analysis. Therefore, it is essential to go through the "University Information" as well as the website of the university carefully before writing your research plan. Writing a research plan is the beginning of your research. It is highly recommended that you keep improving your research plan before departure to Japan after being selected as a JDS Fellow.

#### (2) Outline of the research plan (Example)

<b>Title</b>		Describe the nature of your proposed research clearly. Avoid making it too short or redundant.
Introduction	Background	Position your research theme here to <u>state a significance of your research in the research areas</u> . The literature review is not a part to merely describe preceding studies <u>but to sort out what researches have done, what have been found and what are unknown in your research field</u> . Also consider relevance with development issues and your organization. List the preceding studies in a reference section at the end of your research plan.
	Literature Review	
	Purpose and Questions	
Main Body	Methodology	This is the main part of your research plan. Develop your opinion and give more information. Explain what and how to study. <ul style="list-style-type: none"> <li>▪ Detail your research procedure within the given timeframe.</li> <li>▪ List sources and quality of evidence you will consult with and the analytical technique you will employ, and the timetable you will follow.</li> <li>▪ Describe the intended methods of data gathering, the controls you will introduce, the statistical methods to be used, the type of literature or documentary analysis to be followed, etc.</li> </ul>
Conclusion	Expected Results Significance	Tell the reader the important points to stress and address your future plan. <ul style="list-style-type: none"> <li>• Expected learning/findings from your research</li> <li>• Describe your future plan on how to utilize your research outcome to solve the issues mentioned in the first part after return home.</li> <li>• Describe how your research outcome will contribute to the development of the country and the institutional development of your organization.</li> </ul>
	Bibliography	Include all the resources which are used in the writing of the research plan.

### (3) Warnings about “Plagiarism”

“Plagiarism” is **a serious offense** in the academic field. **Plagiarism** means using other person’s ideas and words without explicitly acknowledging the source of that information.

University students including JDS applicants and Fellows are members of the academic, and must not commit plagiarism in making a research plan and thesis. Otherwise, you may be disqualified from the selection, or even be discharged from the university, once the plagiarism is found in your research plan, or academic work at the university.

**Such cases are deemed as plagiarism:**

- Copying from books or articles written by other authors without permission
- Copying from an internet source without referring to the attribution text or information
- Misrepresentation of someone’s work as one’s original

**To avoid plagiarism, you must cite sources and give credit whenever you use:**

- Other person’s idea, opinion, or theory
- Any facts, statistics, graphs, drawings – any pieces of information – that are not common knowledge
- Quotation of other person’s spoken or written words, or
- **Paraphrase** of other person’s spoken or written words

When you make your research plan, also pay attention to “Paraphrase”.

**Paraphrase** is a re-expression of other person’s ideas in your own words. There is accurate and inaccurate way of paraphrasing.

Here are some websites for more explanation on those matters. Applicants must prepare a research plan carefully to avoid plagiarism.

**A Passage Appears in a Source**

Critical care nurses function in a hierarchy of roles. In this open heart surgery unit, the nurse manager hires and fires the nursing personnel. The nurse manager does not directly care for patients but follows the progress of unusual or long-term patients. On each shift a nurse assumes the role of resource nurse. This person oversees the hour-by-hour functioning of the unit as a whole, such as considering expected admissions and discharges of patients, ascertaining that beds are available for patients in the operating room.

~~Chase (1998) describes how nurses in a critical care unit function in a hierarchy that places designated experts at the top and the least senior staff nurse at the bottom. The experts — the nurse manager, nurse clinician, and clinical nurse specialist — are not involved directly in patient care. The staff nurse, in contrast, are assigned to patients and provide all their nursing care.~~

<b>Background:</b>	
<p>The government of Bangladesh has set the national goals of joining the ranks of upper-middle-income countries by 2030 and developed countries by 2041. Recognizing that improving good governance is essential to the sound and continuous progress of the nation, the Cabinet approved National Integrity Strategy in 2012 to improve governance comprehensively. It has identified in particular the needs to advance reforms to the civil service system and further improve the efficiency of the bureaucracy, as well as enhancing the abilities of central and local civil servants to support such initiatives, in order to formulate, implement, and monitor policies and strategies in each field and provide higher-quality public services. It also emphasizes the necessity of further promotion of decentralization and enhancement of the administrative capabilities of local governments.</p> <p>In the future, policy-level commitment will be important in order to advance these cooperative efforts and establish them firmly as systems. It is extremely important to develop human resources at the executive or policymaking level in this field, through the JDS program.</p>	

<b>Sub-Program</b>	<b>Administrative Capacity Development</b>

<b>Background:</b>	
<p>The Bangladeshi government’s 7th Five Year Plan identifies improving the efficiency of the administration of justice as one pressing issue in the field of governance. As of 2014, the nation’s courts faced a cumulative backlog of more than 3 million outstanding cases, and it is crucial to make the legal and judicial systems more efficient and improve those systems themselves. The plan also identifies as priorities the stabilization of public safety to support the nation’s stable development as well as security of life and property for citizens. Moreover, in the Bangladeshi government’s “Digital Bangladesh” policy, it is recognized as priority to enhance the protection of intellectual property rights for the improvement of investment environment.</p> <p>Considering the need for the creation of legal frameworks for promoting expansion of Japanese companies into Bangladesh and implementation of development projects, it is important to train officials who can take initiative in policy-making in this field. Therefore, it is highly meaningful that JDS project covers this field.</p>	

<b>Sub-Program</b>	<b>Administrative Capacity Development</b>
<b>Component</b>	<b>3. Enhancement of Capacity for Urban and Regional Development Planning and Policy</b>
<b>Objective</b>	Building capacity of administrative officials and other staff involved in making and implementing policies associated with urban and regional development and building capacity of administrative officials/staffs of Executing Agencies involved in making and implementing development projects

<b>Target Organizations</b>	<b>BCS Cadre Officials (All Ministries)</b>
<b>Background:</b>	
<p>While Bangladesh's economic growth over the past decade and longer has been accompanied by rapid urbanization, the urban environment in the nation has worsened steadily due to the unplanned development and inadequate infrastructure in the core cities caused by lack of master plans and related laws and regulations. In addition, there is a tendency apparent for resources to be concentrated in urban areas, whereas poverty rates are relatively higher in rural areas. Therefore, there is a pressing need for measures to encourage development with harmony between urban and rural areas, such as integrated regional development plans.</p> <p>It is urgent to train executive civil servants with the perspectives, abilities, skills, and theoretical grounding to formulate integrated regional plans and policies; thus it is highly meaningful to include this field in the scope of the JDS program.</p>	

<b>Sub-Program</b>	<b>Administrative Capacity Development</b>

<b>Target Organizations</b>	<b>BCS Cadre Officials (All Ministries)</b> <b>Class-1 Officers of Bangladesh Bank</b>
<b>Background:</b>	
<p>(a) Economics Planning and Policy</p> <p>In the 7th Five Year Plan, the government of Bangladesh stipulates sustainable management of public finance and appropriate monetary policies as important reforms for attracting private investment. Since 2000, Bangladesh has been implementing a banking sector reform program aimed at improving prudential regulations, strengthening the oversight capacity of the Bangladesh Bank, and improving competition through greater participation by private banks. Moreover, in April 2012, it adopted the IMF Extended Fund Facility to carry out fiscal, monetary, and investment policy reforms. In addition to activities such as supporting lending to SMEs and the Foreign Direct Investment Promotion Project to implement training on methods of financing for SMEs, with the aim of improving the SME funding mediation functions of private banks and financial institutions, Japan is also providing two-step loans through Bangladesh Bank. In order for Bangladesh to become a middle-income country by 2021 and, furthermore, to achieve the Bangladeshi government's goal of being numbered among developed countries by 2041, a sound macroeconomic structure is indispensable. Such a structure is also essential for effective and efficient implementation of individual aid programs by Japan and ensuring an environment for attracting investment from Japanese private-sector businesses. It is highly meaningful for administrators, including the officials of the Ministry of Finance and the Bangladesh Bank, to acquire knowledge in each field through the JDS program.</p> <p>(b) Public Finance Administration/Public Investment Management</p> <p>The Bangladeshi government's 7th Five Year Plan identifies the following four strategies for public investment management and administration capacity development: (i) capacity building of civil servants, (ii) decentralization, (iii) public-private partnerships, and (iv) enhancement of planning and budgeting processes. With regard to (iii) public-private partnerships, the "Policy Strategy on Public-Private Partnership" was formulated in 2010. Two specialized organizations (the Public-Private Partnership Authority under the Prime Minister's Office; and the Public Private Partnership Unit under the Ministry of Finance) were established, and the procedures related to uncovering potential public-private partnerships projects and their formation, review, and approval has been clearly defined. As for (iv) enhancement of planning and budgeting processes, it is in the process of finalizing Public Financial Management Reform Strategy mainly by the Ministry of Finance. In order for the smooth implementation of initiatives mentioned above, it is important to develop human resources who possess the capability to design mid-and-long term policies and national plans; and skills to set up a system to realize these plans.</p>	

## IV. Special Trainings and Events

JDS Program provides the following opportunities for JDS Fellows only in addition to research at university.

### Government Leaders Networking Event

This special event aims to establish long-term cooperative relationships between JDS Fellows and Japanese government officials by providing opportunities of interaction and mutual learning. JDS Fellows participate in the event and expand their personal networks with Japanese government officials, who would become their counterparts in the future.

### Japanese Language Training

All JDS Fellows participate in Japanese language training after their arrival in Japan. This training provides Fellows with the lessons on Japanese characters (*hiragana*, *katakana*, and *kanji*), greetings, and how to introduce themselves. In addition, they deepen their understandings of Japanese culture, lifestyle and manners, and learn the procedures necessary for staying in Japan such as government office, post office, and bank.

### JDS Pre JDS Pre-return Program

JDS Pre-return Program is held half a year before returning home, inviting all JDS fellows from each university.

During this program, the Fellows have opportunities to attend a series of programs, including leadership program and a special lecture given by a prominent scholar. It also helps them build a network with JDS fellows from various countries.

## V. Voice of JDS Graduates

Voice of JDS Fellows graduated from Master’s course of Japanese Universities under JDS Scholarship Project!

Dear JDS interested folks, you will find that- Japan has good people, comparably comfortable weather (not so hot like ours nor so cold like temperate countries) and beautiful nature. Sometimes we set off to lab after 2/3 a.m. and it's quite safe to go home by bicycle alone. To peruse a Masters here, please be careful about choosing University/ professor since this is very important. If you could learn some Japanese, that will be great to lead everyday life here. All the best to new comers.

The Project for Human Resource Development Scholarship by Japanese Grant Aid (JDS) Scholarship is a prestigious program to make bondage between two countries to speed up the Japanese knowledge and management in Bangladesh and to build capacities of Bangladeshi Officials through her various initiatives. As a Bangladeshi official, I am highly benefited from the theoretical knowledge and practical experience of Japanese governance, management, strategies, policies and development activities from this program. Furthermore, this scholarship builds a global networking among civil servants from many countries with a view to exchanging of views, knowledge, development, governance, policies, strategies, culture and many other things.

Undoubtedly Japan is one of the best countries to learn diverse knowledge not only from the academic institutions but also from the daily Japanese life. The research based learning process of the universities will help enrich one's analytical capabilities and think and proceed logically on a specific matter. In Yamaguchi University, the authority offers those economic and public administration related courses which are essential to build an efficient and potential civil servant who is capable of formulating the best policies for their countries.

Those who are planning for their higher study in a foreign country can consider Japan with the highest priority for some reasons such as, JDS scholarship is one of the best and prestigious scholarships in terms of caring their fellows in all situations; Japan is the best country to learn life lessons from the Japanese life; to enrich yourself with the highest standard of research based teaching along with the top class facilities provided by the Universities.

**Mr. Hasan Muhammad Munirul**

18<sup>th</sup> batch, Keio University,  
Ministry of Information

JDS Scholarship is a big twist of my academic, career and personal life. I studied LLM in Global Legal Practice at the Keio University, Tokyo, Japan. From the reception ceremony of my accepting University, I have experienced many things, very new and interesting, such as: the courtesy, generosity and politeness during the communication with people, when we met with. Japanese life standard is different from other countries. Basically Japanese people are very helpful and honest to the people. Japanese culture and people's characteristics are incredibly rich and best, than that of other countries. Every Japanese is sincere to their task and responsibilities. I have learnt and adopted these things practically from the Japanese lifestyle. Japan will definitely give you feeling, through which you could develop your country.

JDS Scholarship changes my attitude towards life. Definitely, it is a great opportunity to be a research fellow under this scholarship. I have chosen Yamaguchi University which is the third oldest national university in Japan, tracing its roots back to Yamaguchi Kodo, a private school established in 1815. It celebrated its 200th anniversary in 2015. The local area still holds the spirit of the Meiji Restoration, and the university challenges itself to stand up in the world. These values are reflected in the university motto: "Discover it. Nourish it. Realize it. A Place of Wisdom." The university administration works to adapt to the requirements of the times, constantly pursuing innovation as it works to develop human resources and provide education and research that will contribute to the local community as well as international society. The Professors are very helpful and knowledgeable. Life in Yamaguchi city is full of peace and tranquility which emphasizes all the wonderful gifts of God's creation and invites me to contemplation, introspection, and reverie. Here Nature speaks its own language. Natural sights, vast landscapes, distant horizons and sounds of nature trigger in me a feeling of joy and exhilaration that restores my soul to the peace of childhood. The Japanese people are really good in attitude and nature. They will try to help one at any cost. In every place, there is a good system. So, I found no time to be worried. I think it will be a good opportunity to know a country like Japan through study and Cultural integration. Ganbatte ne!

My dream of master's degree in a foreign country came true when I was selected for JDS scholarship in 2015 at University of Tsukuba. I studied about the diversity of courses relating environmental issues. I also took the academic writing course, scientific writing and Japanese language course as well. I attended and presented my paper in some international conferences which enriched my knowledge and experiences about research through sharing the ideas. My two years stay here was one of the most beautiful and memorable times in my life. I enjoyed the very happy and best life with the wonderful friends and professors. I am sure, those days and things made one chapter of my life more interesting and valuable part of my learning experiences. I also would like to mention that the big Bangladeshi community and its activities made my life more enjoying, happy and smooth. Finally, I can only say that I really enjoyed my life in Tsukuba. I love Japan and Japanese people.
